Cloud computing is a general term for anything that involves delivering hosting services over the Internet. A cloud service has three distinct characteristics that differentiate it from traditional hosting. It is sold on demand, typically by the minute or by the hour, it is elastic - a user can have as much or as little of a service as they want at any given time; and the service is fully managed by the provider.

Here is a graphical look at the cloud computing landscape. From private and enterprise cloud providers (such as IBM, HP/3Par, and VMware), to public cloud services (like Google and Microsoft Azure), to the Hybrid cloud (Verizon and the NRE Alliance of newScale, rPath and Eucalyptus as examples).

David Vellante is co-CEO of SiliconANGLE Media, as well as co-founder and Chief Analyst at The Wikibon Project, the world's leading open source technology research community. Dave is a long-time tech industry analyst, entrepreneur, writer and speaker. As co-host of theCUBE - "The ESPN of Tech," Vellante has interviewed over 5,000 experts since 2010. He is also a co-founder of CrowdChat, an angel funded startup based in Palo Alto using big data techniques to extract business value from social data. Prior to these exploits, Dave founded a CIO consultancy and spent a decade growing and managing IDC's largest business unit. He lives in Massachusetts with his wife and four children where he is active in town activities including serving as the president of his town's local "Kiddie Sports" association. Dave holds a B.S. in Applied Mathematics from Union College.
